

Search

“Search” screen has a field to enter keywords. Below that are pre-filter option checkboxes, and Options link to expand settings (this is same one that is available on “Recommendations” screen - but Use Case is here for ease of consultation).

Search Process

1. User taps “Search” icon and that screen opens.
2. User taps search entry field
3. Phone’s keyboard pops up
4. User types in book name or keyword
5. User taps ‘Go’ button in keyboard or ‘Search’ button next to entry field, depending on their preference.
6. Advance to Search Screen with results.

Options (available on both “Search” and “Recommendations” screens)

See Options Use Cases document.

Search Results

Both the “Recommendations” or “Search” screens send their results to this screen, so there is only one place where all results are viewed.

Adding to Wish List

1. User arrives at Search Results screen from either “Recommendations” or “Search”.
2. They see a list of their suggestions / search results
3. User scrolls through the results
4. User finds a comic they know they want to check out later. They tap the Heart/Love icon to add the comic to the system’s Wish List.

Selecting a comic

1. User arrives at Search Results screen from either “Recommendations” or “Search”.
2. They see a list of their suggestions / search results
3. User scrolls through the results
4. User taps a comic they'd like to see details about
5. View Details screen opens
