

View Details

This screen is reached by tapping a comic in either a “List” or in the “Search Results” screen.

When this screen is open, minimize/hide the app navigation bar so the View Details has more real estate by being full screen.

Navigate to other results / list items

1. User uses non-holding hand to tap either the < Previous or Next > buttons
2. View Details screen for previous / next comic in List / Search Results slides in to replace the one currently being viewed

Return to List / Search Results Screen

1. User uses non-holding hand to tap the Back to X link. Tech Note: X replace with ‘List’ if User came to View Details via a List, and ‘Results’ if User came there via Search Results.
2. Return to previous Screen user was on when they tapped a comic in order to open its View Details screen.

Expand Image

1. User taps the cover image thumbnail
2. A modal opens, Lightbox style, with larger version of the cover. Tech Notes: Should scale to about 70% of viewport size, no more.
3. User pinch-to-zooms on the image to see part of it even larger
4. User taps ‘Close’ button and modal closes. Tech Note: should be large and centered at bottom of image so user can easily tap to close with either thumb. Button should be only way to close modal to allow for someone to ‘See that character’s there’ tap the screen without having it close.

Add to Wish List

1. User taps Heart/Love icon
2. Icon's 'on' state is activated and comic is add to the system's Wish List.
3. User decides they didn't mean to do that and taps Heart/Love icon again, which returns icon to 'off' state and removes the comic from the Wish List.

Flagging Comics - Positive and Negative

See the *Options Use Cases* document for details on how this works on View Details screen

Thumb Down

1. User taps Thumb Down icon and it switches from 'off' / greyed-out state to 'on' state
2. App saves to internal database that it should not show this comic in results again, and it will add comic to Dislike List.
3. User realizes they didn't mean to do that and takes the Thumb Down button again.
4. App deletes the internal note not to show this comic, restoring it to what it should show in "Search Results". It is also deleted off the Dislike List and the Thumb Down icon returns to 'off' / greyed-out state.

Tech Note: If a User goes to Dislike List and deletes a comic off it, app should perform actions in Step 4 above.

Add to List - Existing

1. User taps Add to List icon
2. Side Menu slides out, covering most of the View Details screen. It lists all of the archived lists.
3. User taps the archived list they want to add this comic to, triggering a confirmation animation and a border appears around the list.
4. User decides they'd like this comic also added to another list so they tap a second list, , triggering a confirmation animation and a border appears around the list.
5. User changes their mind and taps one of the lists they've selected and the border disappears from around the list to show it has been de-selected.
6. Tapping 'Close' button saves the comic to the selected lists and closes the menu.

Add to List - New

1. User taps Add to List icon
2. Side Menu slides out, covering most of the View Details screen. It lists all of the archived lists.
3. User wants to create a new list, so they tap the + Create new list button at top of menu.
4. Entry options expand down, with "Name" field and Create button.
5. User taps "Name" field and the mobile device's keyboard opens.
6. Tapping the Create button creates the new list, adds the comic to it, then closes the slide menu.

Launch Search Using Terms in View Details Screen

All of the data under "creators" and "Details" should be 'links'.

1. User taps Publisher name under "Details"
2. Search Results opens with results for that Publisher. Same for Genre, Creator Names, etc.
